Profile

Motivated Full Stack Web Developer specializing in front-end and back-end development, with expertise in creating responsive, optimized, and user-centric applications. Skilled in solving complex technical problems and delivering high-quality projects on time. Currently pursuing a certificate in Digital Development (Full Stack Web) and seeking a two-month internship to apply technical skills and contribute to impactful projects.

Formation

1337 Coding School, Ben Guerir – Systems Programming Present

- Currently studying advanced programming concepts in C and C++

Institut Spécialisé de Technologie Appliquée, Ben Guerir – Digital Development 2025
(Full Stack Web Development)

- Specialized technical certificate in Full Stack Web Development

Academic Projects

Web Platform Developer, NightPharm – Ben Guerir Feb 2025

- Designed NightPharm, a web platform to improve access to nighttime and emergency healthcare services
- Implemented real-time pharmacy mapping, 24/7 nurse consultations, and streamlined delivery management
- Utilized modern web technologies to create an intuitive, responsive interface for patients, nurses, providers, and administrators
- Demonstrated expertise in project management, user-centric design, and health-tech solutions

Full Stack Developer Intern, OCBG – Ben Guerir March 2024

- Developed stock and operations management systems using Laravel and MySQL, optimizing inventory and workflow processes
- Designed system diagrams to ensure efficient project implementation and scalability
- Gained experience in full-stack development, database management, and system architecture design
- Collaborated with a team to deliver a functional, user-friendly solution within a tight deadline

Technologies

Front-end: HTML, CSS, Tailwind CSS, Bootstrap, JavaScript, React.js

Back-end: PHP, Node.js, Laravel

Databases: MongoDB, MySQL

Design: Figma, Canva

Version Control: Git, GitHub, GitLab

Development Tools: Visual Studio Code, Jira, Terminal, WordPress, Microsoft Office (Word, Excel, PowerPoint), Docker

Technical Interests

- Front-end and back-end development
- Prototyping and wireframing
- Database design and management
- UI/UX design

- API development and integration (REST/GraphQL)
- Digital marketing
- Content management
